

Development of departmental Action Plans for mainstreaming Disaster Risk Reduction (DRR) and Climate Change Adaptation (CCA) in Urban Development and Agriculture Departments of Andhra Pradesh

Context:

UNDP- Government of India sanctioned project to Andhra Pradesh State Government to carry out vulnerability mapping of Andhra Pradesh, sector/department specific capacity need assessment, and mainstreaming Disaster Risk Reduction (DRR) and Climate Change Adaptation (CCA) in development planning.

As part of it, Intercooperation Social Development India (ICSD) has been entrusted with the assignment of developing departmental Action Plans for mainstreaming Disaster Risk Reduction (DRR) and Climate Change Adaptation (CCA) in Urban Development and Agriculture Departments of Andhra Pradesh.

Goal:

Mainstreaming DRR & CCA in the development planning in Urban and Agriculture sectors

Donor

UNDP-Gol Project to the Disaster Management Cell, Govt of Andhra Pradesh

Partners

Disaster Management Cell, Govt of Andhra Pradesh and State Training Institute

Objectives of the project:

Evaluating the departmental action plans in Urban Development and Agriculture from DRR & CCA perspective; assessing whether DRR & CCA have been accommodated in their respective DPRs; Identification of gaps in integrating DRR & CCA in development planning; suggesting recommendation for interventions

Interventions:

Capacity Need Assessment and Capacity Building for implementing the existing policy framework in the field for mainstreaming DRR & CCA

Achievements:

Structural and Institutional interventions for mainstreaming DRR & CCA in development planning

Publications:

Final Report will be considered by UNDP for possible publication
