

Editing and Designing of Sikkim - State Action Plan for Climate Change

Background: ICSD had facilitated the preparation of the Sikkim SAPCC. After its successful completion of the work, ICSD was entrusted with the additional task of editing and designing the Sikkim SAPCC by GIZ.

Goal: Our objective was to disseminate the information to all stakeholders as a first step towards optimal implementation of the strategies formulated in the document. So we had to generate different levels of information for diverse stakeholders including decision makers for easy understanding of the SAPCC.

Interventions: The ICSD team worked closely with the Department of Science and Technology and Climate Change, Government of Sikkim, other line departments and GIZ to bring this project to a fruitful conclusion.

Achievement: The complete Sikkim SAPCC report with photographs and illustrations has been prepared. An abstract with an edited 20 page 'easy reader' and a folded flyer/pamphlet 'easy-easy reader' with one mission per fold has also been brought out and has been approved by GIZ.

1. Abstract
2. Overview
3. SAPCC Report
